Hydraulic cylinder for Medical Bed:

The hydraulic ram for beauty bed and medical bed with stroke 130mm,140mm,150mm,200mm ,250mm and 300mm,400mm please check which is workable for you.stroke can be customized as you need
And they can bear 250 kgs,the rated load is 300 kgs and max load is 600 kgs. self-lock load is 1000kg

It was developed in 2011 and the mass production began from 2013.

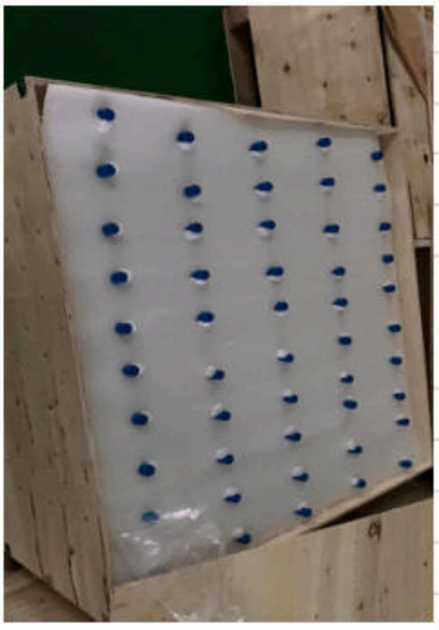

Hydraulic cylinder
Complete specifications, factory direct supply
, stable performance, large quantities from the best

Hydraulic cylinder
Adopt fine raw materials,
fine surface treatment,
no burr, durable

Professional quality and fine craftsmanship
Careful selection
Fine selection of materials
Factory direct supply
Large quantity from the best
Hydraulic cylinder
The simple appearance design from the inside to the outside highlights the quality. Each process is processed with precision

NO	ITEM	SLA-HP250 hydraulic cylinder for hospital bed
1	Material	Carbon Steel, Alloy Steel, 27SiMn,45#,20#,etc
2	Honed tube	25mm, Heat treatment, honing, rolling
3	Piston Rod	22mm, plated nickel or hard Chrome or ceramic
4	Seal kit	Parker, Merkel, Hallite, Kaden, etc
5	Coating	Sandblasting, primer paint, middle paint, finish paint,Color can paint according to customer demands.
6	Technology	double acting hydraulic cylinder
7	Mounting type	trunnion mount
8	Working medium	Hydraulic Oil
9	Working pressure	16-30Mpa hydraulic cylinder for hospital bed
10	Temperature range	-50°C to +100°C
